

Airtech EradoMould Spray is a fungicidal cleaner; containing a powerful blend of biocide and detergent to eradicate mould on internal surfaces.

Form Supplied	Liquid, ready to use
Pack Sizes	500ml bottle
Colour Range	Clear
HSE No	4810
Contains	2% Benzalkonium Chloride
Properties	Airtech EradoMould Spray is used to sterilise mould-infected surfaces before redecorating. It may also be used as a maintenance wash to control mould or algae where painting is not possible or desired. Airtech EradoMould Spray can also be sprayed around bath and shower areas to help control mould growth on sealants and grout.

Usage/Preparation	Ready to use. A second application allowed to dry on surface will delay return of any mould. When used to help prevent mould growth in bathrooms, Airtech EradoMould Spray should be sprayed on to surfaces at least once a week. Do not rinse off. Service life depends on local conditions, i.e. condensation will reduce the expected service life.
Practical Coverage	4 – 6 m ² per bottle, depending on the porosity and roughness of the surface
Application	By sponge, cloth, or spray.
Storage	Between 5°C - 30°C.
Shelf Life	12 months unopened.
General	<p>There are basic measures to assist in the control of condensation and black mould.</p> <p>These methods are particularly helpful in the domestic environment but can be applied equally to commercial, catering, leisure or medical establishments.</p> <p>It is always important to reduce the risk of condensation by observing the following simple recommendations</p> <ul style="list-style-type: none"> • Ensure rooms are always warm and properly ventilated, maintaining some low heating throughout the day if possible. • Always use extractor fans in kitchens and bathrooms. • When cooking and bathing keep the door closed and the window open. • Do not dry clothes on radiators. Tumble dryers must be vented externally unless of the condensing type. • In cold weather keep some heating on all the time. • Improve internal/external wall insulation. <p>Use a ventilation system where appropriate, such as Airtech Positive Input Ventilation (PIV) System.</p> <p>When repainting areas then Airtech Anti-Mould Paint should be used as black mould cannot grow on this.</p>

General Maintenance	Airtech EradoMould Spray will not prevent the re-growth of moss or mould in the long term. Its use is to remove active attacks prior to decoration. For long-term eradication of mould etc a Airtech PIV can be fitted. This device acts to produce a positive air pressure within the domestic environment and will keep the relative humidity below a level that will support condensation.
General and Safety Precautions	Xi - Irritant. R36/38 - Irritating to eyes and skin. Keep out of reach of children. In case of contact with eyes rinse immediately with plenty of water and seek medical advice. After contact with skin, wash immediately with plenty of soap and water. Wear suitable protective clothing goggles and eye/face protection. In case of accident or if you feel unwell seek medical advice immediately (show label where possible). For full health and safety information see Safety Data Sheet.
